

More than ever, organizations need to reduce their spending on goods and services. Verian Technologies' Purchase Manager gives you intelligent tools to reign in maverick spenders and get a deeper level of visibility and control over organizational spending.

All catalog and non-catalog requisitioning is done through a Web-based interface that has the look and feel of common online retail shopping sites. The process is intuitive and simple for employees at all levels.

What Can the Solution Do for Me?

Web-Based Requisitions

Are your employees wasting too much time and energy requisitioning? Modeled after online retail sites, our interface is user-friendly and reduces requisitioning to just a few mouse clicks. Users are given a shopping cart and several different search options, depending on their level of experience with the system. Requisitions can be split by line item if buyers have separate responsibilities.

Approval Routing

Instead of paper approvals getting lost in the shuffle or languishing on desks, route your approvals via email. The system integrates with smart phones for mobile notifications and alerts, allowing users to approve or reject requisitions by line item on the go.

PO Creation & Delivery

Manually sending your purchase orders to vendors adds an unnecessary step in your process. When requisitions are approved, the system automatically generates POs and delivers them to your vendors via fax, e-mail, EDI/XML, or posts to our Supplier Portal for vendor download.

Key Benefits

- Reduce the cost of the goods and services you purchase
- Reduce approval workflow bottlenecks
- Gain visibility into spending
- Gain greater negotiating power and vendor accountability
- Increase efficiency and reduce paper in accounts payable
- Decrease cycle times in the purchase-to-pay process
- Ensure compliance with Sarbanes-Oxley Act
- Ensure purchases comply with your internal policies
- Eliminate maverick spending
- Prevent overspending

"Verian's Purchase Manager fit all of our requirements – Web-based, flexibility to fit into our business processes, strong requisitioning, automated approval routing and integration with accounting."

Andy Gauthier
Purchasing Manager
The Main Street America Group

Managers can approve or decline line items within the inbox of their email system or from a handheld device.

Request for Quote (RFQ)

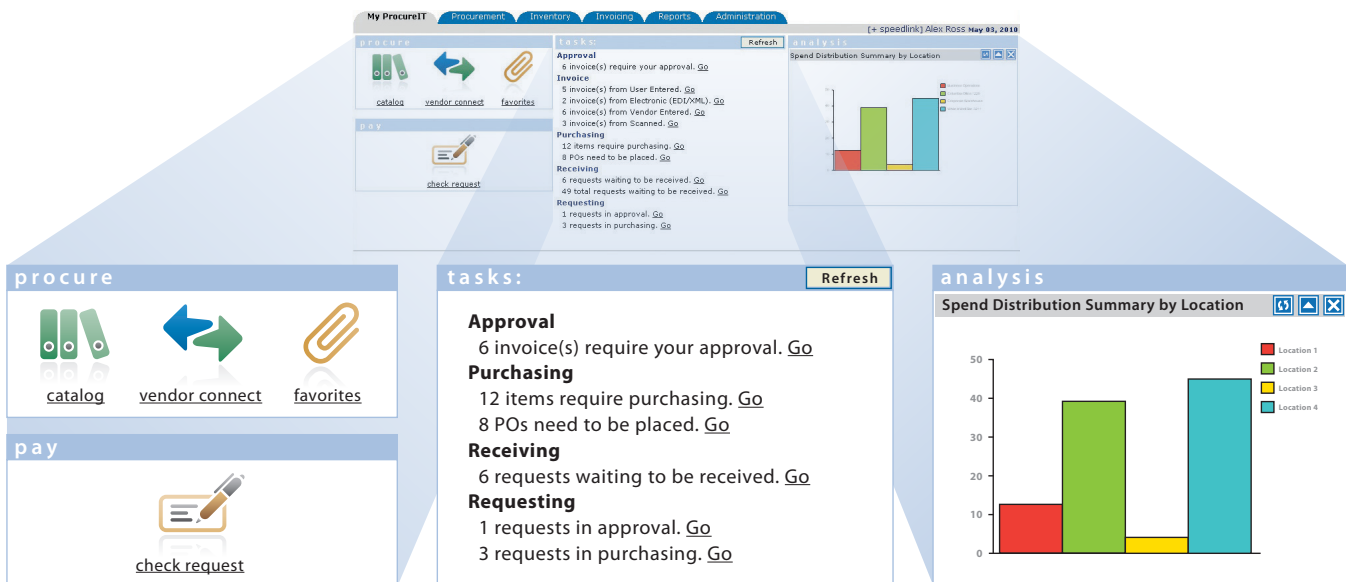

Organizations are often required to get multiple quotes on goods or services prior to committing to spend. RFQ functionality allows you to quickly and easily create and post RFQs online for supplier review and response. Once bids are received, they can be analyzed, evaluated and processed into catalogs or orders.

Receiving & Invoice Reconciliation

Manual matching is an extremely time-consuming process. Purchase Manager automatically matches the invoice, PO and receiving documents to assure a three-way match in the system. The system automatically detects discrepancies that have exceeded your thresholds and routes notifications to a predetermined list of recipients for resolution.

Reporting

Purchase Manager offers a dashboard of reports designed to put actionable, up-to-date information at your fingertips. Use spend data to analyze purchasing trends and evaluate vendors to identify volume purchasing opportunities and gain leverage in negotiations. Integrate with your financial system to receive notifications if budgets are about to be overspent. The system also includes a report writer that helps you quickly and easily create your own custom reports.

Easy-to-read navigation icons quickly get users where they need to be to do their jobs.

In The Task Center, users can see at-a-glance what needs to be done.

Managers have access to a whole dashboard of analytics and metrics.

About Verian

Verian helps mid- and large-sized organizations reduce costs and increase efficiency with intelligent, easy-to-use solutions that automate the entire purchase-to-pay process including procurement, invoice processing, employee reimbursements and asset management – capturing all spend intelligence in a single database for analysis. Verian was founded in 1997 and is headquartered in Charlotte, N.C. The company's clients include Macy's, Recreational Equipment Inc (REI), Boeing, Allstate Insurance, PETCO and General Nutrition Centers (GNC).
